25X1

1. A new type of deep-sea trawler of 1,000 tons, capable of developing a speed of 15 knots, is being built at Gdansk (Danzig).
2. The engines are of Polish manufacture and are said to be already in production.
3. It was rumored some months ago that Polish naval engineers had dismantled a Sulzer-600 engine and were busily engaged in making drawings and carrying out tests with a view to producing a slightly modified model under a Polish name.<sup>1</sup>
4. It may well be that the engines for the deep-sea trawlers which are said to be of Polish make are the result of this research. The Sulzer-600 develops 400 hp. per cylinder.
